EDUCATION

- **Ph.D. in Biomedical Engineering**, Peking Union Medical College, Beijing, China (Sept 1, 2023–June 18, 2026)

  Advisor: Prof. Erping Long

  Degree awarded: Doctoral Degree in Engineering (June 26, 2026)

  The degree certificate bears the signatures of the presidents of **Peking Union Medical College** and **Tsinghua University**.

  Doctoral research: Developed ukbFound using UK Biobank data to identify patient subgroups, study how diseases co-occur, and predict disease risk (npj Digital Medicine, 2026).

  Thesis defense: May 25, 2026

- **M.S. in Biochemistry and Molecular Biology**, Xiamen University, Xiamen, China (Sept 13, 2014–June 30, 2017)

  Research: Bioinformatics data analysis.

- **B.Eng. in Bioengineering**, Jimei University, Xiamen, China (Sept 1, 2010–July 1, 2014)
- **B.Eng. in Computer Science and Technology,** The Open University of China, Beijing, China (Sept 1, 2023–Jan 20, 2026)

TECHNICAL SKILLS

- **Biomedical Data Science:** Analyze clinical and cohort data, model changes in health over time, and evaluate and interpret models for disease risk prediction.
- **Bioinformatics & Statistical Analysis:** Multi-omics, genomic and transcriptomic data analysis; survival analysis, multiple-testing correction, and resampling methods.
- **Programming & Data Analysis:** Python, PyTorch, NumPy, pandas, scikit-learn, and reproducible data-analysis workflows.

PROFESSIONAL EXPERIENCE

- **Group Leader, Molecular Diagnostics (technical staff, not a physician)**
  Affiliated Hospital of Putian University, Prenatal Diagnosis Center
  Aug 18, 2020 – June 5, 2023 | Supervisor: Kun Lin
  Led bioinformatics workflows for clinical genetic testing, including sequencing data analysis, quality control, and variant interpretation. During the COVID-19 pandemic, I also assisted with nucleic acid extraction as assigned by the hospital.
- **Bioinformatics Supervisor**
  Berry Genomics Co., Ltd. | Supervisor: Fuli Yu, Ph.D.
  Jul 2017 – Aug 2020
  Developed and maintained automated bioinformatics workflows for genetic testing, including sequencing data analysis and variant annotation. Built web-based tools to support genetic data interpretation and reporting.

TEACHING EXPERIENCE

- **Part-time Course Tutor**

  Experimental College, The Open University of China

  Sept 1, 2023 – Aug 31, 2025

  Provided online part-time tutoring for the course Special Topics in Artificial Intelligence.

PEER REVIEW EXPERIENCE

Independent peer reviewer (2026): Submitted 14 review reports on 13 manuscripts for seven journals, including the Journal of Medical Internet Research, JMIR AI, and JMIR Medical Informatics. Two further reviews are in progress as of November 4, 2026.

Co-reviewer (with Prof. Erping Long): Nature Medicine; Nature Biomedical Engineering; Frontiers in Aging Neuroscience.

RECENT RESEARCH PROJECTS

- **ukbFound for patient stratification and disease risk prediction**

  Independently developed, built, and evaluated ukbFound, a UK Biobank-based model using deep phenotyping data from more than 500,000 participants. The work supported disease risk prediction, multimorbidity analysis, and patient stratification across 289 conditions (npj Digital Medicine, 2026).

- **Evaluation of medical language models**

  Contributed to data acquisition, curation, and analysis for evaluating collaborative language models on medical questions and clinical reasoning tasks (Cell Reports Medicine, 2026).

- **Multi-omics analysis of COPD and lung function decline**

  Contributed to studies integrating genetic, protein, metabolite, and clinical data to investigate chronic obstructive pulmonary disease (COPD), molecular subtypes, and longitudinal lung function decline (Signal Transduction and Targeted Therapy, Med, and Respiratory Research, 2026).
